Post-doctoral position available

in Laboratoire de Bioénergétique et Ingénierie des Protéines (BIP), CNRS

Marseille, FRANCE.

We have an available position in our group for a post-doc on the development and applications of SDSL-EPR on proteins inside cells with the aim to study proteins structural dynamics in their native environment. The project will start in October 2015.

The candidate will join the EPR team of BIP Laboratory, headed by Pr. B. Guigliarelli and Pr. V. Belle. This team has strong expertise in the field of EPR spectroscopy and its application to biological systems. The team is equipped with X- and Q-band pulsed and CW EPR spectrometers.

The net salary will be of 1800 euro/month.

Background required: PhD in Magnetic Resonance (NMR or EPR) and/or Molecular Biology/Biochemistry/Cellular microbiology.
